

Alameda County BART Riders Learn Green-Binning Tips

April 2015

Ready Set Recycle volunteers, staff, student action team members and Wiggle E. Worm brought green-binning expertise to BART riders at three Alameda County BART stations in March and April. To encourage more food scrap composting, they shared green-binning tips and encouraged people to pledge to compost their food scraps and food-soiled paper to help create healthy, water-conserving soil in California. Special thanks to our student volunteers from Mission San Jose Elementary School in Fremont.
